Redefine Your Advertising & Promotion Strategy

Hot air balloons have dramatically shifted the focus of the global advertising world towards them and their applications. Does your outdoor advertisement make your brand stand out in a crowd?

Imagine your customers (and potential customers) actually stopping their cars to take a picture of your billboard. Even better yet, imagine having your billboard highlighted in a positive way in major media. Believe it or not, it happens all the time, but not for the reasons you'd expect.

Hot Air Balloon advertising has the uniqueness to create a 100 foot tall billboard that will be seen, remembered, photographed and even published for free on TV News broadcasts and in newspaper headlines.

A Hot Air Balloon is mobile and excited, which means it goes out and finds spectators and creates it's own publicity across the full spectrum of media resources. At balloon rallies all across, Hot Air Balloons attract crowds from several thousand to as much as half a million!!
